## CONCORSO PUBBLICO PER ESAMI PER LA COPERTURA DI UN POSTO DI "ISTRUTTORE DIRETTIVO AMMINISTRATIVO" CATEGORIA D, A TEMPO INDETERMINATO.

DOMANDE PROVA ORALE DEL 9 dicembre 2019

### INGLESE

1. As we go through life, we develop a variety of relationships – with family, friends, teachers and, later, workmates and marriage partners. Sometimes, the problems that come up are of our own making, and sometimes they are out of our control.
2. We became friends years ago, but recently I noticed something. I had a problem at home and I told my friend about it, but he wasn't interested. He just didn't want to know. When I thought about it, I realized that he never really cares about any problems that I have.
3. James Dean was born in 1931 in Indiana. His father was a dental technician. The family moved to Los Angeles in 1936, but Dean returned to Indiana after his mother died, where he was brought up by his uncle and aunt.
4. We'd like to invite all our readers to write a review of a hotel. It might be a hotel you've stayed in, or one near where you live. It might be the best hotel you know – or it might be the worst! Send us your reviews. The best review wins a prize of a two-night stay at a hotel of your choice.
5. As children develop the ability to recognize and understand ads and their purpose, they start making demands. If these are not fulfilled, they might start screaming or throwing themselves on the floor.
6. Lakshmi Mittal is the richest man in England, but not much people outside the world of business know his name. He was born in India in 1950, where his father ran a steel company. He went into the family business and after a few years started his own company, Mittal Steel.
7. Behind every great discovery lie long hours of work in the laboratory, not no mention years of expensive education. It's a big investment of time and money, but the chance to be involved in the latest development makes it worthwhile.
8. Many people are attracted to a career as a scientist and it can certainly be rewarding. Finding solutions to problems that affect people's lives can be very creative and give you a real sense of achievement.

9. I'd like you to imagine that you are going camping for a week in the summer with some friends. Here are some things you might take with you. Talk about how useful these things would be and decide which two things you would definitely not take with you.
10. Some water parks have a wave machine in the main pool which makes waves up to a meter high. That makes the whole experience rather more thrilling than in the old leisure centers days.
11. Last summer, I received an email from an old friend. The message said that he was stuck in Italy after all his money had been stolen as he waited to check in at the airport and now, he couldn't afford to get back home.
12. It was a very weird year for me, knowing it was my last season playing professionally. I don't regret taking the decision to retire – you can't go on forever – but with every game I just felt sadder. The end was drawing near.
13. You can volunteer your services at hospitals, old people's homes, and most charitable organizations or political groups. This will benefit you in the future, as colleges and universities will be impressed by any voluntary work you have done.
14. Abigail Doyle spent last Wednesday examining patients, taking temperatures and looking at X-rays. Not unusual, perhaps, for a doctor, but it is unusual when you are just thirteen years old.
15. The future is here already, they say, and in the field of technology it's certainly true that events are unfolding fast. In fact, next month, we will have been predicting the future with great accuracy for exactly a decade.
16. I'm selfish, impatient and a little insecure. I make mistakes, I am out of control and at times hard to handle. But if you can't handle me at my worst, then you sure as hell don't deserve me at my best.

The image shows four handwritten signatures in black ink, arranged horizontally from left to right. The first signature is a cursive 'Jill'. The second is a stylized 'A' inside a circle. The third is a complex, scribbled signature. The fourth is a simple, vertical signature.
